Password: AstroSemi

### **Arman Shafieloo**

(Korea Astronomy and Space Science Institute)

### **Status of the Concordance Model of Cosmology**

I review the status of the concordance (standard)  $\Lambda$ CDM model of cosmology in light of current observations discussing about the apparent tensions in estimation of the key cosmological parameters. I will also briefly discuss the future of the field at the era of the next generation of astronomical/cosmological surveys.

Serdecznie zapraszam,

Agnieszka Majczyna
